Context

Education is the cornerstone of a whole society. It trains individuals, critical minds, and uplifts citizens to become agents of change and progress. To achieve these goals, educational practices constantly evolve and explore new tools and means to educate society in a way that is fair, sustainable and creative. Among these tools is Artificial Intelligence. AI, with its many applications and its flourishing development, is a most relevant tool to support educational transitions. Two major trends can be distinguished: on the one hand, there is educational research in the AI sector, and on the other hand, there is AI in education. However, how do we ensure equity of access to these tools? What are examples of successful applications of AI in education? Which policy recommendations can be identified and shared to organize this educational and digital transition in a sustainable manner? The purpose of this webinar is to raise awareness among participants of “AI in education” and “Education in AI”, discuss best practices across the world, and share policy recommendations to build a fair, sustainable and creative education model.

Webinar Objectives

BUILD A COMMON UNDERSTANDING OF “AI IN EDUCATION” AND “EDUCATION IN AI”:

KEY CONCEPTS AND HISTORICAL TRAJECTORY.

HIGHLIGHT ETHICAL STAKES, WITH A SPECIAL FOCUS ON BARRIERS FOR INCLUSION AND ACCESSIBILITY OF EDUCATIONAL TOOLS IN DIFFERENT SOCIO-ECONOMIC CONTEXTS.

PROVIDE CONCRETE EXAMPLES OF SUCCESSFUL AI APPLICATIONS IN EDUCATION ACROSS THE WORLD.

SHARE A VISION ON THE FUTURE OF EDUCATION AND POLICY RECOMMENDATIONS TO GUIDE ICESCO MEMBER STATES.
Agenda

**Introductory Remarks** by Salim M. AlMalik, Director General of ICESCO, and Kais Hammami, Strategic Futurist

**Presentation of Webinar Objectives, Agenda and Speakers** by Pauline Noiseau, Coordinator at Algora Lab, and Sacha Alanoca, Senior AI Policy Researcher at The Future Society

**Part 1:** “AI in Education” and “Education in AI” by Michaela Horvathova, International Education Policy Expert, and Niki Iliadis, Senior AI Policy Researcher at The Future Society
