The Learning Passport

The Learning Passport is an online, mobile, and offline platform that enables continuous access to quality education. It is highly flexible and adaptable, allowing countries to easily and quickly adopt the Learning Passport as its national learning management system or use it to complement existing digital learning platforms.

The Learning Passport, powered by Microsoft, has been developed with a unique suite of online and offline functionalities and abilities. The platform will prioritise deployment in places with intermittent or no internet connectivity – often locations that children find themselves unable to access quality digital education tools and content.

The platform serves local, contextualised content and global supplementary resources to support learners and improve learning outcomes. We are currently collating a library of Open Educational Resources (OERs) and content donations by leading private companies to offer various supplementary content for localisation and use by implementing offices.

Deadline: Monday 28th June, 2021

Synopsis of the Expo

This call for expo is aimed to identify and connect with good quality Open Education Resources (OERs) and copyright content for adoption into the Learning Passport Platform. This call looks for ready-made content such as courseware, PowerPoint slides, notes, graphics, animation, audio, simulation, video, wikis, and any other digital content of high quality and excellent level of user interaction. The expo is expected to deliver the following key outcomes:

Key Outcomes

- ❖ To enable the Learning Passport project team to offer an outstanding learning experience to students with high quality teaching utilising local innovation and technologies.
- ❖ To support Federal and State Ministry of Education in generating world-class teaching and learning content aimed at reducing shortage in digital content.
- ❖ To enable continuous access to education beyond the classroom and improved learning outcomes.
- ❖ Empower local content developers and innovators to maximise their contribution to the economy and society by connecting their content to the broad audience.
- ❖ Continue to mentor content developers to improve in their quality.
