Potential Users of the Directory

The following persons and organisations will find use of this Directory.

- Members of the Nigerian, African and global higher education communities
- Vice-Chancellors seeking experts to assess candidates for appointment into professorial and other positions
- Federal, State and Local Governments in Nigeria as well as Ministries, Departments and Agencies requiring Nigerian experts for consultancies and other appointments.
- African governments and governments from all over the world needing Nigerian experts for consultancies and other appointments.
- International development partners needing Nigerian experts for consultancies and other appointments.
- Scholars from all over the world needing research collaboration and partnerships with Nigerian scholars.
- All other persons and organisations interested in the services of full professors from the Nigerian university system.

How to use this Directory

- The Directory is sectioned into 15 disciplinary clusters. A colour-coded flap separates the list of entries for each discipline. Users can search for a full professor in a discipline by scrolling through the alphabetical listing of surname.
- The telephone number and email address of each professor are provided at the end of the profile summary for that professor. Contacts can be made of professor through these channels.
- To download the CV of a professor of interest, type on the address bar of your browser: (<https://fullprofessors.nuc.edu.ng/wp-content/uploads/PROF-SURNAME-CV-6.doc-LATEST.doc>). It is important to replace “SURNAME” in the link with the surname of the Professor. Please take extra care to ensure that the address is typed exactly as it appears in the Directory.
- If a user has the electronic version of the Directory, simply click on the link for downloading the CV.

Foreword

Once again, it is my pleasure to deliver the foreword of the 2021 edition of the Directory of Full Professors in the Nigerian University System. The publication is a commendable piece by the National Universities Commission and a monumental success of the Executive Secretary of the National Universities Commission, Professor Abubakar Adamu Rasheed *mni, MFR, FNAL*.

The need for sound university education can never be overemphasised. The growth of university education around the world is basically reliant on the effective utilisation of its tripartite functions driven by technology and skills. It is evident that the Nigerian University System has gained landmark achievements over the years from successful collaborations, partnerships and linkages within and outside the shores of Africa. As the Nigerian University System expands its frontiers of learning, it has become imperative to continue to acknowledge and note the rich caliber of professors in the system that have not only provided high-level skills necessary for the labour market, but also the training of essential myriads of personnel that develop the capacity and analytical skills that drive the local economy, support civil society, lead effective governments, and make important decisions that affect the society and humanity.

This Directory is not just a repository that seeks to capture the quality of expertise that exists in the Nigerian University System and scholars who have contributed meaningfully to the world's reservoir of knowledge, but it also reflects the nation's embodiment of quality talent and professionalism. It is a storehouse of diverse knowledge of excellence that serves as an open resource to various stakeholders in the education sector, the nation and the world at large.

Nigeria is indeed blessed with experts in various fields of endeavours that will continue to empower and nurture favorable regulatory frameworks and governance structures that aid national development. The Federal Ministry of Education will continue to attest to the goodwill of this laudable initiative that showcases the rich stock of our nation's reservoir of knowledge and endowment, which is in consonance with the Ministerial Strategic Plan on education and the Education Strategic Development initiative that is targetted at attaining a knowledgeable society. The Federal Ministry of Education commends the effort put into the update of this annual publication and recommends its use to relevant stakeholders and the general public.

Mallam Adamu Adamu
Honourable Minister of Education

Preface

Education is the backbone of any society as much as ignorance is its bane. The university imparts profound knowledge and understanding in order to advance students to new frontiers of knowledge capable of producing skilled and competent human resources leading to a self-sustained and vibrant economy. Taking into account the superior scholarly inclinations and curriculum expertise of Professors, they are laden with the responsibility of nurturing young minds and impacting such knowledge that will continue to shape the face of the country economically, socially and politically.

Becoming a professor in Nigeria has often been described as a herculean task. This is as a result of the rigorous and uncompromising processes a scholar passes through in order to attain the highest possible rank within the Nigerian educational system. The professorial position signifies the peak of expertise in research and innovation, which births social and economic growth, technological advancements as well as a generally knowledgeable society.

Since the inception of this novel initiative, the directory has become a publication with the purpose of updating authentic information, which is aimed towards a better structuring of Nigerian universities by providing vital and up to date information for persons and organisations within and beyond the borders of the country with need for professional collaborations, consultations, as well as research.

The directory will not only serve as a digital tracker system that documents the location, academic profiles and research interests of professors, but also remain a means of showcasing academic connoisseurs in Nigerian universities to the outside world.

The previous publication of the directory of full professors contained a list of 4,850 professors. Due to the tenacity of Nigerian scholars, the list keeps growing, hence the need for an updated and verified edition to be used by academic communities, public, media libraries, as well as scholarly and research organizations.

I would like to commend the Executive Secretary of the National Universities Commission, Professor Abubakar Adamu Rasheed *mni, MFR, FNAL* for ensuring the continuity of this ingenious project.

Professor Emeritus Ayo Banjo

Chairman, Board of the National Universities Commission

Introduction

It is no longer news that the Nigerian University System (NUS), has, over the years, suffered acute dearth of data/statistics regarding relevant indices. From student enrolment figures to the number of staff (academic and non-teaching) within the system, it has been an uphill task to collect relevant data in the NUS. Statistics drive economic development decisions at every level. Accurate data and statistical information ensure that informed decisions are taken by decision-makers on the viability or otherwise of projects, and the NUS is no exception.

Cognisant of the fact that effective planning based on data drives the success and development of an educational system, the National Universities Commission, through the efforts of its Strategy and Advisory Committee (STRADVCOM), initiated a compilation of recognised faculty in the professorial cadre in the NUS. This culminated in the publication of the maiden edition of the Directory of Full Professors in the Nigerian University System in 2017. The publication sought to provide credible information about professors in the system while checking the activities of persons with questionable character, and without the requisite qualifications, masquerading as professors, to secure placement in the NUS. The NUC is the sole agency that is responsible for the regulation of university education in Nigeria. It is in recognition of its regulatory role that the Commission, has taken the bull by the horns to ensure that accurate data exists on the various components of the university education sub-sector.

Enrolment in the maiden edition of the Directory of Full Professors in the Nigerian University System was optional and, as such, some eligible faculty were not captured. This second edition of the directory is an opportunity to update the existing database of professors, to reflect new entrants into the professorial cadre within the system as well as reflect those who were not captured in the premier edition. Since its publication, the first edition has served as a viable database of resource persons for accreditation and resource verification exercises to academic programmes in the NUS. Universities can also verify the qualifications of potential faculty before they are recruited. The Directory of Full Professors in the Nigerian University System is only a first. The NUC hopes, in the near future, to consolidate its success by diversifying its data collection to include other parameters that are relevant to stakeholders of university education in Nigeria and globally. This would ensure that relevant information are available for research, planning and development in all areas of human endeavour.

A lot of work went into the production of this edition. The NUC acknowledges, with sincere appreciation, the efforts of members of the NUC Strategy and Advisory Committee (STRADVCOM), ably led by none other than Distinguished Professor Peter Okebukola *OFR*, which birthed the maiden edition of this publication. The Commission also deeply appreciates the commitment of its Director of Academic Planning, Dr Noel B. Saliu, whose hard work and diligence saw the production of this edition. To the staff of the Commission, “the foot soldiers”, who in one way or another, contributed to the success of this project, whether by formatting, proofreading, editing, or any other means, we say a big “thank you”.

As promised in the first edition, the Commission will continue to update this publication from time to time to reflect new entrants into the professorial cadre and ensure a credible database of full Professors in the system.

Professor Abubakar Adamu Rasheed, *mni, MFR, FNAL, HLR*
Executive Secretary

Brief on the Nigerian University System

The development of university education in Nigeria started with the inauguration of Elliot Commission of 1943, the report of which led to the establishment of University College, Ibadan (UCI) as an affiliate of the University of London in 1948. In April 1959, the colonial Government set up the Ashby Commission to advise it on the higher education needs of the country for the first two decades. Before the submission of the report, the Eastern Region Government established its own university, University of Nigeria, Nsukka in 1960. The implementation of the Ashby Report led to the establishment of the regional universities in the Western and the Northern Regions: University of Ife (now Obafemi Awolowo University), Ile-Ife and Ahmadu Bello University, Zaria in 1962 respectively as well as a Federal university, the University of Lagos also in 1962. This also led to the establishment of the National Universities Commission (NUC) as an administrative Unit in the Cabinet Office of the Federal Government. The University College, Ibadan became a full-fledged University in 1963. In 1970, the Midwestern Region (carved out of the Western Region) established the University of Benin. The six universities are referred to as First Generation Universities.

During the third National Development Plan (1975-1980) and owing to strident demands for more universities in the wake of the geopolitical restructuring of Nigeria into twelve States, the Federal Government took over all the Regional ("Ashby") universities and established seven more universities located in Calabar, Ilorin, Jos, Sokoto, Maiduguri, Port-Harcourt and Kano - the Second-Generation Universities. The Federal Government established specialized Universities of Technology between 1980 and early 1991 in Owerri, Makurdi, Yola, Akure and Bauchi while a University of Agriculture was established in Abeokuta. During this period, some of the States also established universities. These were found in Rivers, Anambra, Lagos, Osun, Imo, Cross-River and Ondo States. The Federal Government also took over some State universities as new States were carved out of existing ones and these included the Nnamdi Azikiwe University, Awka and University of Uyo while the defunct Open University in Abuja became the University of Abuja with a Centre for Distance Learning and another University of Agriculture established in Umudike. The universities established during this period are the third-generation universities.

The inclusion of education on the Concurrent List in the Constitution of the Federal Republic of Nigeria means participation of the States governments while participation by the private sector and individuals in the delivery of education to the public was made possible by Decree No. 9 of 1993. The public was invited to participate in offering university education in 1983 but the in-orderly manner in which all the 31 universities were established led to their closure. However, the Federal Government suspended the closure order when Decree No. 9 of 1993 was promulgated. This has led to the orderly establishment of private universities in Nigeria, the first three having been licensed in 1999. It should be noted that these universities were established to be citadels of learning and development.

Section 8 (59) of the National Policy on Education (2014) outlined the aims of higher education thus:

- Contribution to national development through high-level manpower training.
- Development of the intellectual capabilities of the individual to understand and appreciate their local and external environment.
- Acquisition of both physical and intellectual skills which enables the individual to be self-reliant and useful member of the society

- Promotion and encouragement of scholarship and community services.
- For national unity and the promotion of national cohesion, understanding and integration.

Section 8(60) of the document also states that higher education in Nigeria should vigorously pursue these goals through: teaching and learning; research and development as well as knowledge generation and dissemination and international cooperation; and dedicated service to the communities through extra-mural and consultancy service. In spite of the laudable goals of higher education, the Nigerian tertiary (higher) Education Sub-sector suffers from certain challenges that have undermined the quality. These include inadequate funding, paucity of academic staff, inadequate and deteriorating infrastructural and instructional facilities as well as inadequate admission slots in the universities on the one hand and low patronage of the polytechnics and colleges of education on the other hand. Proprietor Governments and private organisations require to address these problems with the seriousness they deserve.

By December 2020, there were over four thousand programmes across the entire universities with academic staff strength of about 77,000. By far, however, the greatest change has been in the explosion in student population and the number of aspirants seeking university admission. The total student enrolment in all Nigerian universities grew from just over 2000 in 1962 to about 1.94 million in December 2020. About two million candidates registered to take the Unified Tertiary Matriculation Examination (UTME) in 2020.

Minimum Standards for Attaining the Full Professorial Rank in the Nigerian University System

Attaining the rank of full Professor in the Nigerian university system is metaphorically like a camel through the eye of the needle. The process is one of the most stringent in Africa and when global comparisons are made, the minimum standards are comparable to what obtains in older university systems in Europe and North America.

The first level qualification is to have a doctorate degree in the area of specialisation. For medical scientists, a recognised professional Fellowship is generally accepted although in a few years' time, insistence on a doctorate degree in the special area of medicine will be the acceptable minimum. The second filter is to have put in at least three years of teaching (in a university or other tertiary-level institution), research and community service at each level of lectureship. There are four such levels- Lecturer Grade 2, Lecturer Grade 1, Senior Lecturer and Associate Professor. Hence, before being considered for promotion or appointment to the rank of full Professor, the academic/scholar would have put in a minimum of twelve years of university teaching and research.

The third and about the most important filter is the assessment of scholarship. This involves evaluation of the published works of the full Professorial candidate by seasoned (senior) full Professors in the field of the candidate. Typically, a minimum of 60 internationally-published works (about 80% being articles in high-impact international journals) will qualify a candidate to receive a positive assessment. At least one of the assessors is expected to be from a well-ranked university outside Nigeria, preferably from Europe or North America. At least two positive assessments will qualify the candidate for the final step which is screening via a rigorous oral interview. The interview is a composite assessment of the candidate on teaching (length and quality) research (scores returned by the external assessors) and community service (internal and external). With an overall score exceeding a set minimum by the university, the candidate is then processed to the University Council for appointment. The variations from one university to another in Nigeria are marginal although the older universities would appear to pitch higher than these minima.

JATAU, Jacob Shekwonudu is a Professor of Production and Materials in the Faculty of Engineering and Engineering Technology, Abubakar Tafawa Balewa University, Bauchi. He holds a Ph.D. from Donetsk Technical University, Ukraine (1992). He was the Director Distance Learning Centre (2006 - 2010). His current research is on Composite materials. He has successfully supervised 5 Ph.Ds. He is currently supervising 4 Ph.Ds. He was appointed a full Professor in 2003. He has taught full-time for 26 years. His email address is jacobjatau@atbu.edu.ng. His telephone number is 2348036183602.

JEKAYINFA, Simeon Olatayo is a Professor of Farm Power and Machinery in the Faculty of Engineering and Technology, Ladoke Akintola University of Technology, Ogbomosho. He holds a Ph.D. from the University of Ibadan (2004). He is currently the Dean. He was the Director of Academic Planning (2012 - 2015). His current research is on Renewable Energy Development. He has successfully supervised 12 Ph.Ds. He is currently supervising 6 Ph.Ds. He was appointed a full Professor in 2010. He has taught full-time for 22 years. His email address is sojekayinfa@lautech.edu.ng. His telephone number is 08033942248. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/CV-2019-Jekayinfa.doc>

JIBRIL, Yusuf is a Professor of Electric Machine Drives in the Faculty of Engineering, Ahmadu Bello University, Zaria. He holds a Ph.D. from Ahmadu Bello University, Zaria (2015). He is currently the Head of Department. He was the Head of Department (2015 - 2021). His current research is on Polyphase Induction Machine Applications in Industrial Systems and Renewable Energy. He has successfully supervised Four Ph.Ds. He is currently supervising Seven Ph.Ds. He was appointed a full Professor in 2018. He has taught full-time for 25 years. His email address is jjusuf@abu.edu.ng. His telephone number is

JIYA, Jibril Danladi is a Professor of Control Systems Engineering in the Faculty of Engineering and Engineering Technology, Abubakar Tafawa Balewa University, Bauchi. He holds a Ph.D. from Northeastern University, Shenyang. P. R. China (1999). He is currently the Dean. He was the Dean (2014 - 2016). His current research is on Control Systems Engineering. He has successfully supervised Five Ph.Ds. He is currently supervising Six Ph.Ds. He was appointed a full Professor in 2009. He has taught full-time for 26 years. His email address is jibjiya27@gmail.com. His telephone number is 07032153315.

JOEL, Manasseh is a Professor of Highway and Transportation Engineering in the College of Engineering, University of Agriculture, Makurdi. He holds a Ph.D. from the University of Nigeria, Nsukka (2006). He was the Head of Department (2010 - 2014). His current research is on Use of Agro-Industrial Waste Material in the Stabilization of soil for use as Pavement Material in a Climate Change Era. He has successfully supervised Three Ph.Ds. He was appointed a full Professor in 2016. He has taught full-time for 21 years. His email address is manassehjoel@yahoo.com. His telephone number is 08032104329. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/CV-FOR-NUC-DOCUMENTATION-OF-PROFESSORS.docx>

JOHN, Olumurewa A. Victor is a Professor of Food and Bio-resource Engineering in the Faculty of Agriculture, Federal University of Technology, Akure. He holds a Ph.D. from the University of Ibadan (2005). He is currently the Head of Department. He was the SIWES Coordinator (2014 - 2018). His current research is on Development Food Processing Equipment. He has successfully supervised Two Ph.Ds. He is currently supervising Four Ph.Ds. He was appointed a full Professor in 2015. He has taught full-time for 21 years. His email address is jav_murewa@yahoo.com. His telephone number is 08062966602.

JOHN, Samuel Ndueso is a Professor of Computer Engineering in the Faculty of Engineering and Technology, Nigerian Defence Academy Kaduna. He holds a Ph.D. from Donetsk National Technical University (2015). He was the Dean (2015 - 2016). His current research is on Computer Science, Computing Machines, Complex Systems, Networks, and Cyber Security. He has successfully supervised Three Ph.Ds. He is currently supervising Six Ph.Ds. He was appointed a full Professor in 2014. He has taught full-time for 15

years. His email address is samuel.john@nda.edu.ng. His telephone number is 08062994678. **Download CV:** https://fullprofessors.nuc.edu.ng/wp-content/uploads/Sam-John_NOUN_new1.doc

KAREEM, Semiu Adebayo is a Professor of Chemical Engineering in the Faculty of Engineering and Engineering Technology, Modibbo Adama University of Technology, Yola. He holds a Ph.D. from the University of Lagos (2010). He was the Dean (2016 - 2019). His current research is on Bioreaction and Biokinetics. He is currently supervising Two Ph.Ds. He was appointed a full Professor in 2016. His email address is sakareem_1@mautech.edu.ng. His telephone number is 08034414673. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/CURRICULUM-VITAE-40.docx>

KAWUYO, Umaru Adamu is a Professor of Farm Power and Machinery in the Faculty of Engineering, University of Maiduguri. He holds a Ph.D. from Ahmadu Bello University, Zaria (2011). He was the Course Adviser (2014 - 2019). His current research is on Animal power and soil tillage. He was appointed a full Professor in 2019. He has taught full-time for 18 years. His email address is kawuyo2011@gmail.com. His telephone number is 08028545806. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/CV-12.docx>

KEHINDE, Lawrence Olakunle is a Professor of Mechatronics Engineering in the College of Engineering, Federal University of Agriculture, Abeokuta. He was the Dean (2019 - 2021). His current research is on Instrumentation. He has successfully supervised 10 Ph.Ds. He was appointed a full Professor in 1988. He has taught full-time for 50 years. His email address is kehindelo@funaab.edu.ng. His telephone number is 08135155743.

KHAN, Reyazul Haque is a Professor of Manufacturing Technology (Foundry Science & Engineering) in the Faculty of Engineering, Baze University. He holds a Ph.D. from Indian Institute of Science, Bangalore, India. (1977). He is currently the Head of Department. He was the Dean (2000 - 2002). His current research is on Materials, Product & Process Development for Near Net-Shape casting production and Quality control. Computer Applications in Foundries. Nanotechnology and Composites development. He has successfully supervised 11 Ph.Ds. He was appointed a full Professor in 1993. He has taught full-time for 28 years. His email address is reyazul.khan@bazeuniversity.edu.ng. ORAKWE, Louis Chukwuemeka is a Professor of Soil, Water and Environmental Engineering in the Faculty of Engineering, Nnamdi Azikiwe University, Awka. He holds a Ph.D. from the University of Nigeria, Nsukka (2010). He was the Head of Department (2014 - 2019). His current research is on Water Resources, Irrigation and Soil Conservation. He has successfully supervised Two Ph.Ds. He is currently supervising Six Ph.Ds. He was appointed a full Professor in 2019. He has taught full-time for 12 years. His email address is lc.orakwe@unizik.edu.ng. His telephone number is 08066623938. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/LC-ORAKWES-CV-December-2020.docx>

ORODU, Oyinkepreye David is a Professor of Reservoir Engineering and Characterisation in the Faculty of Engineering, Covenant University Ota. He holds a Ph.D. from China University of Geosciences (2009). He is currently the Head of Department. He was the Postgraduate Programme Coordinator (2015 - 2017). His current research is on Waterflood performance and interconnectivity estimation, and fault characterisation by capacitance resistive model; High Pressure High Temperature Fluid Properties Estimation: Empirical and Semi-Empirical (Equation of State), and Data Analytics – Machine Learning Enabled Approach. He has successfully supervised Nine Ph.Ds. He is currently supervising Three Ph.Ds.

He was appointed a full Professor in 2017. He has taught full-time for 12 years. His email address is preye.d.orodu@gmail.com. His telephone number is 07061132990. **Download CV:** <https://fullprofessors.nuc.edu.ng/wp-content/uploads/Prof.-Orodu-CV.docx>

OSASONA, Oladipo is a Professor of Electronic Materials and Devices Fabrication in the Faculty of Engineering, Redeemer's University, Ede. He holds a Ph.D. from Obafemi Awolowo University, Ile-Ife (1988). He is currently the Dean. He was the Head of Department (2010 - 2014). His current research is on Electronic Materials. He has successfully supervised Three Ph.Ds. He is currently supervising Two Ph.Ds. He was appointed a full Professor in 2007. He has taught full-time for 44 years. His email address is ladiposasona@yahoo.co.uk. His telephone number is 08034105774. **Download CV:** https://fullprofessors.nuc.edu.ng/wp-content/uploads/LadiCV-2021_NUC.doc

OSHA, Odey Ade is a Professor of Chemical and Process Engineering in the Faculty of Engineering and Technology, University of Calabar. He holds a Ph.D. from Belarussian State Technological University, Minsk, Belarus (1993). He is currently the Dean. He was the Head of Department (2008 - 2011). His current research is on Material Science and Waste Recycling. He has successfully supervised Five Ph.Ds. He is currently supervising Two Ph.Ds. He was appointed a full Professor in 2011. He has taught full-time for 20 years. His email address is oshaodee@gmail.com.
